

DEPARTMENT OF DEFENSE

BASE STRUCTURE REPORT

FISCAL YEAR 1999

**OFFICE OF THE DEPUTY UNDER SECRETARY OF DEFENSE
(INSTALLATIONS)**

#964

DEPARTMENT OF DEFENSE BASE STRUCTURE

INTRODUCTION

Installations are vital to national security. The real investment this Nation makes in its defense base structure and facilities is an investment in its military and civilian people – an investment that enhances the working and living conditions for our people which is repaid in the form of improved pride, greater performance and enhanced combat readiness.

Installations and properties range widely in assigned personnel and the amount of property controlled: from unmanned navigational aids on one-half acre to the Navy's installations at Norfolk, Virginia, with over 110,000 employees, and the Army's White Sands Missile Range in New Mexico which encompasses over 3.6 million acres.

CONTENT AND ORGANIZATION

The Structure Report provides an understanding of the scope and purpose of DoD base structure as it was at the end of Fiscal Year 1999 (March 30, 1999). The report furnishes information on each installation, for the purpose of this report defined as a site owning more than \$1 million AND having a Plant Replacement Value greater than one million dollars. Since the DoD owns few acres outside the United States or possessions, the criteria for inclusion of overseas installations was ten acres OR a Plant Replacement Value exceeding one million dollars. The report is organized by Military Service and then by state within the Service list. The report includes the installation location, the name of the installation, zip code, the number of buildings owned and leased, total acres occupied by the Services and the total acres owned, the authorized personnel, military, civilian, and "other" personnel. Also included under the "BRAC" column, is a notation, if appropriate, as to the installation's status regarding a Base Closure Commission recommendation. At the end of each state list, there is a category called "Other". This category includes combined totals for all those installations/sites owning ten acres or less and has a Plant Replacement Value of one million dollars or less.

DATA SOURCES AND DEFINITIONS

All data were extracted directly from the individual Services' real property inventories; i.e. Army – HQ Army Integrated Facilities (AIF), Navy – Navy Facilities Assets Database (NFADB), and the Air Force's Real Property Asset (RPA) database. These databases contain a multitude of data not directly related to this report, so data was extracted to meet the parameters contained below. An analysis of criteria used for each column is shown below to more accurately define the constraints applied to each category. Personnel data is shown to the level of detail shown in this report from all Services was not readily available from a single source. Though information was obtained from the Defense Manpower Data Center and some was provided by the individual Services, these numbers should be used as estimates

not refined data. Every attempt was made to show authorized strength by location, but most personnel data are rolled up by parent numbers may not reflect the personnel at actual unit locations.

EXPLANATION OF COLUMNS

INSTALLATION: Indicates the installation or site name as depicted in the Services' databases. This is based on the Services' Installation Number (Army and Air Force) or Unit Identification Code (Navy and Marine Corps). The notation "multi-sites" shown after installation names means a parent unit is located in another state, so the data reflected only shows those facilities in the state listed.

COMPONENT: Designates the primary component owner of a site or installation, either Active, Guard or Reserve.

NAME NEAREST CITY: Identifies the name of the nearest city.

ZIP CODE: Identifies primary Postal Code associated with the site or installation. Many large installations have multiple postal codes.

BLDGS OWNED: Identifies the number of facilities owned by the Service at that particular site or installation. It does not include licensed or permit facilities, State-owned National Guard facilities or facilities provided by foreign nations at overseas locations. It does include only facilities designated as "buildings" and does not count "structures," which could be anything from tent pad sites to carports.

BLDGS OWNED SQFT: Reflects the building square footage for the facilities identified above as owned as stated in the Services' databases.

BLDGS LEASED: Identifies the number of facilities leased by the Services for use. It does include only facilities designated as "buildings" and does not count "structures," which could be anything from tent pad sites to carports.

BLDGS LEASED SQFT: Reflects the building square footage for the facilities identified above as leased as stated in the Services' databases.

TOTAL ACRES: Identifies the total number of acres occupied by the DoD. It includes public land, state land, land owned by other federal agencies and acreage of foreign soil occupied by overseas installations.

ACRES OWNED: Reflects only those acres actually owned by the DoD.

PRV (\$M): Total Plant Replacement Value (PRV) for all facilities occupied by the DoD as well as those facilities overseas that are not owned by DoD, such as NATO or foreign owned, but show a PRV in the database. This value is calculated on the cost to replace the current physical plant (facilities and supporting infrastructure) using today's construction cost (labor and materials) and standards (methodologies and codes).

MIL: Identifies all known military personnel authorized for the site or installation. Includes both active duty and Guard or Reserve personnel.

CIV: Identifies all known DoD civilian personnel authorized for the site or installation.

OTHER: Identifies all known other civilian personnel authorized for the site or installation, including Non-appropriated Funds (NAF) personnel, Foreign Nationals (direct hire) at overseas locations, and any full-time contractor personnel.

TOTAL: Sum of MIL, CIV, and OTHER personnel columns.

BRAC: Reflects any identified Base Realignment and Closure (BRAC) Actions.

CONCLUSION

Base structure is dynamic and is influenced by changing force structure, wartime scenarios, resource availability, advancing technology, other factors. The combination of these factors requires that the Department continually examine its base structure and attempt to use structure with force structure in order to maintain an efficient and effective base structure to meet current and projected peacetime requirements.
